

## Java - Abstraction and Polymorphism -#1

### Report Summary

Name	: <b>Rithesh B</b>
Your Score	: 85 out of 100 (85%)
Correct Answers	: <b>17 Question</b>
Incorrect Answers	: <b>3 Question</b>
Unanswered	: 0 Question
Passing Grade (%)	: 70%
Time Taken	: 30 mins
Your Result	: <b>Pass</b>
Email	: rithesh@codecraft.co.in

## Your Answers

Correct

Points earned: 5 out of 5

Q1) Can we declare class as private?

- A. True
- B. False (Your Answer)(Correct)

Correct

Points earned: 5 out of 5

Q2) Can we declare an abstract class without abstract methods?

- A. True (Your Answer)(Correct)
- B. False

Correct

Points earned: 5 out of 5

Q3) Dynamic Binding or Late Binding is:

- A. Connecting the method and the parameters
- B. Because of overridden method and the use of the appropriate method during execution (Your Answer)(Correct)
- C. Because of overloaded methods
- D. When formal parameters and actual parameters differ

Correct

Points earned: 5 out of 5

Q4) What is the order of access modifiers in JAVA ?

- A. private - protected - public - default
- B. private - default - protected- public (Your Answer)(Correct)
- C. default - public - protected- private
- D. private - default - public - protected

Correct

Points earned: 5 out of 5

- Q5) Interfaces can contain \_\_\_\_\_ and \_\_\_\_\_ and abstract classes can contain \_\_\_\_\_ , \_\_\_\_\_ and at least \_\_\_\_\_
- A. Variables, constants, abstract methods and non abstract methods
- B. Abstract methods, constants, instance variables, implemented methods and one abstract method (Your Answer)(Correct)
- C. Constants, implemented methods, variables, abstract methods, overridden methods

Correct

Points earned: 5 out of 5

- Q6) What is an abstract class?
- A. An abstract class is one without any child classes
- B. An abstract class is any parent class with more than one child class
- C. An abstract class is a class which has at least one abstract method which cannot be instantiated. (Your Answer)(Correct)
- D. Is a "base class"

Correct

Points earned: 5 out of 5

- Q7) Does interface set an example for 100% abstraction?
- A. True (Your Answer)(Correct)
- B. False

Correct

Points earned: 5 out of 5

- Q8) Access modifier protected sets an example for encapsulation
- A. True
- B. False (Your Answer)(Correct)

Incorrect

Points earned: 0 out of 5

- Q9) Does a subclass that extends an abstract class have to give implementation to all the abstract methods of the superclass?
- A. Not necessarily if the sub class is going to be declared abstract (Correct)
- B. Yes-an abstract parent must have abstract children (Your Answer)(Incorrect)

- C. No--an abstract parent mu have no children at all
- D. Yes --all children of an abstract parent must be non-abstract

Correct

Points earned: 5 out of 5

Q10) A class that is declared final cannot be subclassed.

- A. True (Your Answer)(Correct)
- B. False

Correct

Points earned: 5 out of 5

Q11) What are the applicable access modifiers for the local variable?

- A. Default
- B. Private
- C. Final (Your Answer)(Correct)
- D. Public

Correct

Points earned: 5 out of 5

Q12) An abstract method cannot have a return type. True or false?

- A. True
- B. False (Your Answer)(Correct)

Correct

Points earned: 5 out of 5

Q13) Can an abstract class define both abstract methods and non-abstract methods?

- A. Yes - the child classes will inherit both (Your Answer)(Correct)
- B. Yes - but the child classes do not inherit the abstract methods
- C. No--it must have all abstract methods
- D. No--it must have all one or the other

Correct

Points earned: 5 out of 5

Q14) Can an interface have a class on top?

- A. True
- B. False (Your Answer)(Correct)

Incorrect

Points earned: 0 out of 5

Q15) Which is correct?

- A. Abstract class extend a concrete class, interface and abstract class
- B. Abstract class implements an abstract class and interface
- C. Abstract class extends an abstract class and implements an interface (Correct)
- D. Abstract class extends a concrete class and implements abstract class. (Your Answer)(Incorrect)

Correct

Points earned: 5 out of 5

Q16) Can an interface implement another interface?

- A. True
- B. False (Your Answer)(Correct)

Correct

Points earned: 5 out of 5

Q17) What is an interface?

- A. A class with at least one abstract methods
- B. A collection of abstract methods and constants (Your Answer)(Correct)
- C. A super class with abstract method
- D. A sub class with abstract method

Correct

Points earned: 5 out of 5

Q18) What is Polymorphism in Java?

- A. An object which has abstract method
- B. Multiple inheritance - polymorphism
- C. Hiding under a different name
- D. The feature of deciding which overridden method will be used at the run time of a prgram (Your Answer)(Correct)

Points earned: 0 out of 5

Incorrect

Q19) What is an abstract method?

- A. is any method in an abstract class
- B. Is a method which cannot be inherited
- C. A method which is not implemented. The implementation for this method needs to be done in a non abstract class which extends this class. (Correct)
- D. is a method in the child class that overrides a parent method (Your Answer)(Incorrect)

Correct

Points earned: 5 out of 5

Q20) In order for the following code to be correct, what must be the type of the reference variable card? \_\_\_\_\_ card; card=new Valentine("Joe",14); card=new Holiday("Bob"); card=new Birthday("Emily",12);

- A. Valentine
- B. Holilday
- C. Birthday
- D. Card (Your Answer)(Correct)
